HAVE endeavoured in the following Directions to lay every Thing plainly before the Learner that is necessary, and nothing else, and in such Order as should be observed in Teaching.

A ND for the better Encouragement of the Learner, I have fet the Mi only in two Places, viz. in B and E; for when the Mi is fo often shifted by Flats and Sharps, it is a great Disadvantage in Learning.

THE

GAMUT, or Scale of MUSICK.

HE first Thing to be done in order to the right understanding of Psalmody, is, to get the Cists or Keys

(which are feven in Number; viz. A, B, C, D, E, F, G) perfectly by heart upwards and downwards, as they fland in the Gamut (or Scale of Musick.)

In the next Place, these three Characters which are in the Scale, viz. E must be understood: Which are the

Three figual Cliffs. The first of which is called the F Cliff, A 2

and is defigned to direct to the Pitch of the Bassus. The second is the C Cliff: This directs to the Pitch of the Tenor and Contra Tenor. But when it is placed upon any other Line, still that Line is C, and the Lines and Spaces above and below have the Keys shifted according to it; as it may be seen in the Third Line for the better Conveniency of the higher Notes, and by this means D is lost at the bottom Line, and G comes in at the Top. The third is the G Cliff, this directs to the Pitch of the Treble.

As for the Key, or Ground of a Tune, that depends upon the concluding Note of the Bassus; and there are only two, and are called Natural Keys; viz. C faut, and Are, because they alone of the seven, can render any Tune Flat or Sharp, without placing the Character at the Beginning of a Tune, and by considering the Station of the last Note, you may understand whether they be Flat or Sharp, with respect to the third above; for if it be a Lesser, the Key is Flat; if Greater, then Sharp.

The Greater Third.

The Lesser Third.

The Lesser Third.

Sharp Key, La Sol Fa. Flat Key, Fa Mi La.

The Thirds are called Greater or Lesser, according to the
Number of Semitones contained in them; a Greater consists of

Four, and a Lesser of Three.

The Places of Semitones, or Half-Notes in every Octave (or Eight Notes) Ascending or Descending, may be known by the following Rule, viz.

In every Octave, Example.

Two Half-Notes we have;
Both rifing to Fa,
From Mi and from La.

La Mi Fa Sol La Fa Sol La.

There is another Character which is called either Flat or Sharp, the Flat is marked thus, (b) and when it is placed at the beginning of a Tune, alters both the Name and Sound of every Note upon that Line or Space where it stands, except contradicted by another Flat or Sharp; it alters the Sound by making it half a Note lower than it would be sounded without it.

When

When it is set before some particular Note in the Tune, it alters the Sound, by making the Sound of it half a Note lower, and is called Fa

The Sharp is marked thus, (*) which when plac'd before any fingle Note within a Tune, alters not the Name, but only the Sound; for such a Note is sung half a Note higher than its Place directs without it.

But when it is plac'd at the beginning of a Tune, it alters both the Name and the Sound; turning Fa to Mi, and half a Note higher, unless contradicted by Flats.

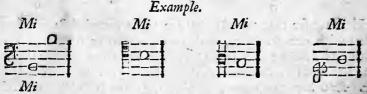

The Effects of Flats and Sharps, as to the Sound, may be

remembred by these two Lines.

Under each Flat a Half-Note lies, And o'er the Sharp the Half doth rife.

The Names of the Notes are next to be learned, and in order to that, Mi the Master-Note, is to be found by the following Rules.

Whene'er no Flat your B does grace, Then Mi stands in its Line and Space.

But when a Flat is found in B, That Note is Fa and E is Mi.

5 1- VIA	Exa	mple.	- 1 - 1
Mi	Mi	Mi	Mi -
2 0	6-9-1 51 7-0-1 Mi		

Having by these Rules found the Master-Note, the rest are easily known by this Rule.

Above your Mi, twice Fa, Sol, La, And under Mi, twice La, Sol, Fa, And then comes Mi, in either way.

So that Mi, Fa, Sol, La, are all the Names that the Notes have (now in u(e) with respect to Tune, but their different Names with respect to Time, is as follows.

Time, in Order to which the Distinction, Measure and Proportion of Notes are to be observed. As to the Distinction, they have different Characters and different Names with rela-

tion to Time; for Instance, This Character = is a Semibreve,

this a Minim, this a Crotchet, this a Quaver, this a

Semiguaver. As to their Measure, that is according to the Time that is mark'd in the beginning of every Tune.

If the Mark of Common-Time be fet before a Tune, thus every Semibreve is to be founded as long as one may distinctly

count, or leifurely read One, Two, Three, Four.

This being the true Measure of a Semibreve, the Proportion which the rest bear to it, is seen by this Scheme following.

The state of the s

Here we see that two Minims are to be sounded in the same Time with one Semibreve, and two Crotchets in the same Time with one Minim; and two Quavers in the same Time with one Crotchet, and two Semiquavers in the same Time with one Quaver. And here the way of keeping the Time is to Sing one Minim with the Hand down, and the other with it up. (Or as many lesser Notes as come to the same Length of Sound.)

But sometimes there is a little Dot or Prick on the Right-

fide of a Note, as thus, Die which fignifies that

Note should be sounded half as long again. This makes a Semibreve three Minims, a Minim three Crotchets, a Crotchet three Quavers, &c.

Semibreve. Minim. Crotchet. Quaver. Simiquaver.

Those Strokes or Marks which are set on the Right-side of the Notes, are called *Pauses* or *Rests* (that is, a Cessation of Sound) which are of the same Length and Quantity (as to the Mea-

Measure of Time,) with the Notes which stand before them, and are likewise call'd by the same Names, as Semibreve Rest, Minim Rest, Crotchet Rest, &c.

If this 3- Mark be set before a Tune, it denotes Triple-Time,

which is one third swifter than Common-Time; and you must sound three Minims in this Time, as you do a Semibreve in Common-Time; and three Crotchets in the same Time, as you do a Minim (or two Crotchets) in Common, Time, &c. And here the way of keeping of Time, is to Sing two Minims with the Hand down, and but one with it up (or as many lesser Notes as come to the Length of Sound) so that the Hand is as long again down as up. The Hand should fall at the beginning of every Bar, both in Common and Triple Time.

In this Book there are some Anthems with three Crotchets in

a Bar, mark'd thus, 3, the prick'd Minim, thus, is the Time-

Note, and the way of keeping this Time, is to Sing two Crotchets with the Hand down, and one up.

When you meet with three Quavers, with a Figure of Three

over them, you must Sing them in the same Time of a Crotchet. Thus there are several other Marks which frequently occur in Musick, as

use when they are broke by the Narrowness of the Paper, is to direct

upon what Key the following Note of the succeeding Line is placed.

2dly, A Tye for drawn over or under two or more Notes,

fignifies fo many Notes to be Sung to one Syllable.

3 dly, A Hold (?) which shews that the Note over which it is placed, must be held something longer than its common Measure.

4thly, Two Strokes through the Lines, thus fignifies the

End of a Strain.

5thly, A Repeat (:S:) when fet over the Lines, shews that from that Place where it stands to the Double Bar next following, is to be repeated. The

The eight Notes ascending and descending when a Lesson is put in Crotchets, two are to be Sung with the Hand down, and two up, as in the following Example.

Here followeth an Example in Triple-Time, when a Minim is to be Sung with the Hand up, and a Semibreve down.

There are feveral Graces in Musick, but the most principal is a Trill; which is the shaking of two distinct Notes easily upon one Syllable as long as the Time allows, always beginning with the higher, thus:

It ought to be used on all descending Prick'd Crotchets, also when the Note before is in the same Line or Space with it, and generally before a Close or Cadence.

Note, in some Places of this Book the Treble Sings alone, and where there are not Voices to reach that part, the Tenor may Sing it in an Eight below.

In the Pfalm-Tunes are set down what Distance the Contra and Treble do pitch from the Tenor, except when it is worded from the Bassus.
