PREFACE.

HAVING been told frequently that my Guida Atmonica is not commonly underflood, and that it has been cenfured by fome as being of little Ufe, becaufe the Bafs is there fet down without Rules for composing the other Parts; I have refolv'd to explane my Defign more fully, and fatisfy the Lovers of the Art, by Inftructing them in the Method of making the intended Ufe of my Work.

I do indeed own, that my Book does not Teach the whole of the Art of Composition; but still I affirm, that the Notes of the Bass, to which numbers are annexed in the Guida Armonica include Harmony, Modulation and Melody; of all which the following Examples will be a sufficient Proof. By these, Students of the Art of Composition will see with great Evidence, that good Melody is implied in good Harmony, and good Modulation : And that they can never be at a Loss for good Harmony and Modulation, if they will be at the Pains to confult the Directions prefixed to the Examples, in which the Guida Armonica abounds.

Those who defire to improve their Notions of Harmony, and to join the Knowledge of the Tone Major or sharp Key, to that of the Tone Minor or flat Key; as also to acquire just Ideas of the Contrast of the several Parts of Imitation, and other Particulars, will find great Assistance from the first and Second Books of the Art of Accompanying with the Harpsichord published formerly by me.

As to the Motion that may be given to the Bafs, according to the nature of its fundamental Harmony, there are no Examples given in this Supplement, becaufe many are to be found in my two Books of Accompanying abovementioned.

EXPLANATION of the EXAMPLES.

EXAMPLE. I.

A. TS a Fundamental Bass, taken at Random from the Guida Armonica.

B. The Manner of Barring that Bafs, according to the Rule already given in the Directions for the Use of the Guida Armonica.

C, D, E. Are three fimple Melodies, compos'd upon the fame Bafs, arifing from its Harmony; in which the Variety of Melody that may be found on the fame Harmony, is to be observ'd : NB. When a Note has no Figures over it, the perfect Harmony, (Compoled of a 3d, 5th, and 8th,) is to be understood.

A Note mark'd with a 6th, fhould be accompany'd with a 3d and 8th, which is an imperfect Harmony.

A Note which has a 5 over it, with a Dash across the Tail thus 5 : fignifies, that 'tis a Diffonant Harmony, and it must have a 3d and 6th, for its Accompanyment.

A Note with a 4th and 2d over it, should be accompany'd with a 6th.

A Note with a 7th over it, is a Diffonant Harmony, and should in general be accompany'd with a 3d and 5th.

This Diffonant of the 7th, when introduc'd in the Melody compos'd on a Bafs, ought to defcend by Gradation, as it does in the third Barr of Letter C.

The fame is to be observed of the 4th and 2d, which is always made by Binding the Bass; after which, this Part must descend by Gradation, that is, to the next Note under it; this will be better underftood by observing the second Barr of C. D. and F. And it Must be observ'd as a general Rule, that the Part which binds, (be it the Treble, or Bafs) muft always defcend, and by Gradation.

NB. The 4th and 2d whenever 'tis found over D la fol re, in the Guida Armonica, muft always be accompany'd with a Minor 6th, as may be observed in the second Barr of Letter D.

The

The 4th and 6th, may be accompany'd with the 8th, if the 4th be naturally Perfect; but if it be naturally, or accidentally Major, inflead of the 8th, the 2d may be apply'd. #1/2

NB. Letters A, B, C, D, and E, may be faid to contain, Motion of Polition only.

F. Is a Composition of a livelier Motion than the former; for to a Minim are put two Crotchets, and to the Semibreve four, or two Crotchets and a Minim, and each of these form different Intervals with the Bass, arising from the Fundamental Harmony.

G. Is a Composition of a yet more lively Motion, or of greater Volocity than the former; in which is introduc'd the Diffonants in paffing Notes by Gradation, afcending or descending. Observe well the first Barr of this Example, it begins with the Concord of the 8th, and proceeds on to the Difcord of the 7th; the 6th is alfo a Difcord, the 5th a Concord, the 4th a Difcord, and the 3d a Concord; the 6th I here call a Difcord, becaufe the fundamental Harmony is perfect, and not imperfect. In this Cafe its to be obferv'd then, that two Difcords may follow each other by Gradation, for if a 5th is introduc'd in the Melody, where the Fundamental Harmony requires a 6th, it must be confider'd as a Discord, this may often be found in thefe Examples. The first and third Notes of the fecond Barr are Fundamental Difcords, the middle Note between them, must be reckon'd as a paffing Difcord, and which, has no Part in the Harmony. The fourth Barr begins with the 6th, a Concord; the 5th a Difcord; returns to the 6th, and paffes on to the 4th a Concord, because the 6th and 4th is the Fundamental Harmony.

H. In the third Barr of this Example, the laft Crotchet of the Barr, (which is a 4th) is a Difcord to the Fundamental Harmony, and is permitted, becaufe it proceeds by Gradation to a Concord in the firft Note of the next Barr. In the feventh Barr, the fifth Note of the Barr is a Concord ; the two following Notes (that is the 5th and 4th) are both Difcords, and the 3d a Concord. In the tenth Barr, inftead of beginning with the Concord (according to the common Rule) the Barr begins with the Difcord of the 4th, and proceeds on to the 3d, a Concord, which is the principal Note; the fame is to be obferv'd in the other half of the Barr. The next Barr to this, (which is the eleventh Barr) begins with the 7th, which in this Place is a Concord; for a Minor 7th, with a Major 3d, is a Concordant Harmony, and may be made Ufe off without a Ligature.

EXAMPLE II.

A. Is a Composition of three Parts upon the fame Bass, proceeding by fimple Motion, upon plain Position of Harmony. - The Parts are composed in

in fuch a Manner, that if any one of them was fung or play'd alone. it would produce a very agreeable Melody, which is a principal Object to be attended too, by all those who would compose well.

B. The fame is to be obferv'd in this Composition as in the former, except the Paufes, or Refts, which are very neceffary, for two Reafons : The first, for causing a new Subject to be definictly heard when it comes in. The fecond, to avoid Confusion in the Parts, and to prevent their finging ill, it being in Mufic, as in Company, much better for any one to be filent, than to prate on, and fay nothing to the Purpofe.

C. This contains the fame (with Refpect to what is to be observ'd) as the former, and only differs in the Composition.

D. What's observable here is that while the first Part proceeds by lively Motion, making Ufe of Concords and Difcords paffing, the other Part begins with a Subject anfwering the Bafs, which I have call'd before, Motion of Polition.

E. Here you are to observe the variety of Motion, that will always produce a very good Effect, without caufing the leaft Confusion: But in Cafe any two Parts make the fame Motion, in thirds and fixths, it will always produce a good Effect, as it does here in the eighth and ninth Barr. Two thirds Major moving by Gradation, muft be avoided afcending or defcending. except in the Cadence of Sufpenfion, as in the 7th and 8th Barrs of this Composition.

F. This Composition is Instrumental, and it must be observed, that Notes which skip in quick Motion, (as is the Cafe here) are very improper for the Voice, for which Reafon, I call fuch kind of Paffages Inftrumental,

EXAMPLE III.

A. Is a Composition of four Parts, proceeding by Motion of Position. B. Different Motion in each Part, which proceeds by Imitation.

EXAMPLE IV.

A. A different Bass from the former, but taken in the fame Manner as the other was from the Guida Armonica.

B. Is the fame Bafs, but barred in Triple Time, the Manner of doing which is thus. If you put one Semibreve in a Barr, a Dot must be added to that Semibreve; or if two Semibreves, the first or last may be a Semibreve.

C. Is a lively Motion of Melody composed on this Bass, chiefly in Confonants.

D. The fame kind of Motion as in the former; Confonants and Diffonants introduc'd, the latter by Ligatures.

E. The

E. The like Motion as in the former, but with this difference, that Diffords are here introduc'd by paffing Notes.

F. Motion of Polition, likewife lively, and quick Motion with Difcords paffing are here introduc'd.

G. The fame Motions as in the former, but in a different Composition, though it must be observed that fome fincopated Notes are here introduc'd, as appears in the 5th, 8th, oth and 11th Barrs.

H. Nothing more is to be obferv'd in this Composition than in the former, it differing only in the Composition; fome of these last Compositions are calculated more for the Inftrument than the Voice.

EXAMPLE V.

A. A Composition of three Parts; Confonants and Diffonants are here used in Ligatures and passing Notes.

B. C. Two Compositions of lively Motion: In the last Barr of the Letter B, the Bass begins the Subject of the first Treble, in the next proceeding Composition of the Letter C, but this is arbitrary.

EXAMPLE VI.

A. Is a Composition of four Parts, wherein the Conforants, and the Diffonants by Ligatures are introduc'd, and by fimple Motion.

B. C. Are Compositions of grave, and allo lively Motion of Confonant Harmony; of Diffonants by Ligatures, and Diffonants by palling Notes: These two last Compositions are in the Stile of Imitation.

I muft not omit five Articles of great Confequence, to be ftrictly obferv'd.

1/2. The Diffonants ought never to be doubled when bound.

2d. The 5th, (even Perfect, and much lefs when Imperfect) fhou'd not be doubled.

3d. An accidental fharp Note, fhould never be doubled.

4th. Two 5ths, and two 8ths, upon two different Notes, (be it with the Bals, or any of the other Parts.) is always prohibited.

5/b. Going from the 6th to the 8th, upon the fame Note, (be it with the Bafs, or any other Part,) is always to be avoided.

These Articles will be better underflood by observing well the last Plate of this Supplement.

N.B. Those who will frequently read the Rules explaining the Intention of these Examples, copy them very often, and at the fame Time, not Neglect composing on various Bass from the *Guida Armanica*, will become able to compose the Bass, and the other Parts from their own Experience.
